Traction Technician (f/m/d)

1110 Vienna, Job-ID: mh0an4th, [#SiemensMobility](#) [#Systemengineer](#) [#ElectricDriveSystems](#)
[#RailVehicleTechnology](#)

At SIEMENS Personaldienstleistungen GmbH (SPDL), a subsidiary of Siemens AG Austria, an exciting work environment backed by over 25 years of experience awaits you. We offer challenging opportunities within the diverse Siemens Group and with our well-known clients across Austria. We believe in equal opportunities, cultural diversity, and shared success.

To strengthen the team in the field of rail vehicle technology at our client, **Siemens Mobility GmbH** in 1110 Vienna, we are seeking an experienced and committed **Traction Technician (f/m/d)** from the earliest start for 38,5h/week. The position offers a diverse range of responsibilities related to the development, design, and support of electric drive systems for innovative rail vehicles.

Your responsibilities

- **Designing & Dimensioning:** You'd be independently designing complex traction systems, focusing on high-voltage equipment, converters, motors, gearboxes, brake resistors, transformers, coolers, and auxiliary inverters.
- **Simulations:** You'll be running simulations to optimize these electric drive systems within the overall vehicle context.
- **Customer & Supplier Interaction:** This involves analyzing customer specifications, creating technical responses, drafting supplier specifications, and coordinating with both customers and suppliers. You'll also represent the company in technical discussions.
- **Component Selection:** You'll support the selection and evaluation of components, working closely with Procurement and Quality Assurance.
- **Documentation:** Keeping clear records and preparing reports and presentations in both German and English is also a key part of the role.

Your perspective

Depending on the specific qualifications and professional experience, a gross monthly salary of at least EUR 4.341,85 is envisaged (this in any case exceeds the minimum salary under the collective agreement). The final salary agreement will be reached in a personal

Your qualification

- Several years of professional experience and deep knowledge in rail vehicle traction technology, especially in the areas mentioned above (high voltage, converters, motors, etc.).
- Practical experience with simulation tools.
- Experience interpreting customer specifications and developing technical specifications for suppliers.
- Technical project management experience is a plus.
- An independent, structured, goal-oriented, and analytical working style with a high degree of initiative.
- A strong team player.
- Strong communication skills in German and English.

How do I apply?

We are looking forward to receiving your online application!
