Full Stack Developer (m/f/d)

8010 Graz, Job-ID: twsnpod0, #Backend #Frontend

At SIEMENS Personaldienstleistungen GmbH (SPDL), a subsidiary of Siemens AG Austria, an exciting work environment backed by over 25 years of experience awaits you. We offer challenging opportunities within the diverse Siemens Group and with our well-known clients across Austria. We believe in equal opportunities, cultural diversity, and shared success.

We are looking for a **Full Stack Developer (m/f/d)**, for 38,5 h/week for **Siemens Energy Austria GmbH**. The ideal candidate will have a passion for developing innovative and scalable web applications. You will be responsible for designing, developing, and maintaining software solutions that align with the strategic goals.

Your responsibilities

- Experience in full stack web development using Typescript/JavaScript, Angular, HTML5 and CSS3
- Develop robust and scalable back-end services using Java, Node.js, and Python
- Ensure the performance, quality, and responsiveness of applications
- Troubleshoot, debug, and optimize existing systems as well as implement and maintain security best practices in application development
- Work in an agile development environment and contribute to continuous integration and deployment (CI/CD) practices
- Write clean, maintainable, and efficient code following industry best practices
- Participate in code reviews and provide constructive feedback to team members

Your perspective

Depending on the specific qualifications and professional experience, a gross monthly salary of at least EUR 3.780 is envisaged (this in any case exceeds the minimum salary under the collective agreement). The final salary agreement will be reached in a personal meeting.

At our client you enjoy and value the freedom of a flexible mix of working from home and in the office. You will also benefit from a flat hierarchy and a transparent company structure. The position is available at the

Your qualification

- Bachelor's or master's degree in computer science, Software Engineering, or a related field
- 3+ years of experience in full-stack development with Angular in front-end and back-end development experience with Java, Node.js, and Python
- Experience with SQL such as Postgres database systems and knowledge of RESTful APIs, microservices architecture, and cloud-based solutions
- Familiarity with DevOps tools and CI/CD pipelines
- Understanding of Agile methodologies and working in a Scrum environment
- Experience in the design and implementation of scalable software systems, on-premises or cloud infrastructures
- Creativity in problem-solving, critical thinking, and excellent communication skills in English (German proficiency is a plus)

How do I apply?
